Carpal Tunnel Syndrome. In this review, we evaluate the 'HealthmateForever YK15AB Deluxe Tens Unit for Pain Relief' to help you see whether this is the unit you need or not. HealthmateForever YK15AB TENS Unit Review Model: YK15AB 3 Key Features: 15 modos 80 minute timer Lifetime warranty Number of Electrodes: 4 outputs 8 pads What is a TENS unit? A transcutaneous electrical nerve stimulation (TENS) unit transmits mild and safe electrical signals via electrodes that are placed on your skin to the pain receptors in your nerves. When used with proper instructions, this unit is a safe and easy way to reduce pain in your body. Benefits of the HealthmateForever YK15AB Reduce menstrual pain: By placing the electrodes in your normal cramps occurring area, you might be able to reduce severe period cramps as well. As it is a small device, you can reduce your menstrual pain even when you are on the go. Soothe contractions during labor: You can decrease your labor pains with this TENS unit. As it doesn't have to be administered at specific timing during the contractions like pain medications, TENS unit is a far better way to alleviate labor. However, it should be noted that this product should not be used during the birthing period.Decrease pain perception: The unit helps the body produce higher levels of endorphins (feel good chemicals) with the electromagnetic pulses, and helps decrease the perception of pain. Convenient pain relief: This TENS unit is light and can be used at the comfort of your own home or even in the office. It is easy to charge and easy to use too. Little to no side effects: While painkillers can result in kidney problems and a high chance of overdose, this pain relieving product has little to no side effects and is relatively safer to use.. However, if you have been taking pain meds regularly, do consult with your doctor before immediately switching to HealthmateForever YK15AB. How to use the HealthmateForever YK15AB Use rubbing alcohol to clean off any dirt on your skin before you place the electrodes. Make sure the rubbing alcohol has fully dried before you place the electrode. Unlike for other TENS unit, this product does not require you to put an extra layer of gel with the electrode. First, press the wire plug firmly to the output port at the top of the unit. Then, by inserting the pins to the female pin electrodes, connect the electrode pads to the electrode wire. Remove the protective film and put the electrodes on your targeted body part, making sure that the pads are not overlapping each other and that both of them are on your skin. Then turn on the TENS unit using the on/off switch. It will automatically start from mode 1. If you want to choose another mode, change the mode by pressing one any of the 15 different mode buttons displayed on the device. As there are two separate channels, you can use them on two different body parts. You can control your A1/A2 ports using the buttons located on the left side of the device, and control your B1/B2 ports using the buttons located on the right side of the device. You can use the (+) and (-) buttons to control the intensity of the two channels. Press (+) to increase the intensity and (-) to decrease the intensity. The manufacturers recommend the intensity to be placed at a level where you experience involuntary muscle movements and small amounts of muscular vibration. If it is uncomfortable, decrease the intensity. You can increase and decrease the frequency by pressing speed (+) or speed (-) for the channel in use. 15 Programs and Modes 9 custom designed modes: Neck, Shoulder, Back, Elbow, Hip, Ankle, Knee, Foot/hand, And Wrist; 6 therapeutic methods: Knead, Acupuncture, Tapping, Cupping, Scraping, and Random. After each session, make sure you wash your skin where the electrode had been placed. The pads might not start sticking to your skin after numerous uses. At this time, you might want to contact customer service and ask for replacement pads . Click Here to View this TENS Unit on Amazon! Features of the Healthmate Forever YK15AB AAA Batteries This product uses AAA batteries and the kit itself comes with three of these batteries. This type of battery is widely available and can be obtained from any supermarket. User-friendly buttons Unlike other popular TENS unit in the market, HealthmateForever YK15AB does not use any confusing jargons in its buttons like 'waveforms' or 'pulse width' and instead, it writes the function like it is. The buttons labelled 'Shoulder', 'Elbow' are easy to comprehend, even for people who might be weak in English. LCD Screen The buttons are easy to read as well with its large LCD display and backlight. The backlight helps you to look at the buttons even in low lighted areas without having to squint your eyes too much. It also makes it convenient for old people or people with poor eyesight. Dual channels This product has two channels - A and B. These independent channels can be used for left side and right side of your body, one side at a time or both sides at the same time. Belt Clip The belt clip on the backside of the remote controller makes it convenient for you to carry your TENS unit around everywhere you go. It also leaves your hands free to do other tasks. Who should use this HealthmateForever YK15AB? This HealthmateForever YK15AB might be especially suitable for people who are suffering from acute and chronic pain. If you feel like you spend way too much time and money on your visits to a massage therapist, then this might be the ideal product for you too. Although the initial price might be a little high, this product might actually help you save time and money in the long run. Always make sure to consult your doctor before using any TENS unit device. Click Here to View this TENS Unit on Amazon! Who shouldn't use this HealthmateForever YK15AB? This product shouldn't be used by people using pacemakers as the electromagnetic pulses of the TENS unit might interfere and cause the device to malfunction. It also shouldn't be used by pregnant women as the pulses generated might be harmful to the unborn fetus. However, this TENS unit can be used during labour, always consult your doctor first though, as it can help soothe the contractions. Do note that it should not be used during any other time in the pregnancy. This product is also not suitable for people suffering from certain heart diseases or epilepsy. Consult your doctor if you are unsure whether a TENS unit is the appropriate pain relieving method for you or not. If you have any acute disease, a tumor, infectious disease, high fever, lack of skin sensation or an abnormal skin condition contact your physician before using this device. Customer Support and Warranty The lifetime warranty offered by Healthmate International LLC is valid in the USA and Canada only. The warranty states that 'A lifetime warranty is a warranty against defects in materials and workmanship that has no time limit to make a claim, rather than a warranty that the product will perform for the lifetime of the buyer.' Although this lifetime warranty does not cover any damage caused by accident, abuse, normal wear or misuse, alteration to the product, Healthmate provides consumers with the option of a 2 year accidental warranty which covers damages caused by the consumer's neglect. This accidental warranty is priced at \$100. Do note that this TENS unit is exchangeable but not refundable. If you have any further questions, you can call the manufacturer at (888)-860-7788 Monday to Friday, 10 am to 5pm. Final Thoughts The HealthmateForever YK15AB chair is a great deal if you are looking for a convenient form of pain relief without several complications. Click Here to View this TENS Unit on Amazon!
